1 Download Guide

The following provides general instructions with which to download application(s) required to install SACS on a single computer system. The images and version numbers depicted may not be up to date but the general procedure remains correct. You will need your Bentley login and password information to log into the Bentley website in order to download applications.

If you do not have logon information, please contact your local Bentley office at 1-800-Bentley (236-8539), outside the United States +1 610-458-5000, or please click [here](#).

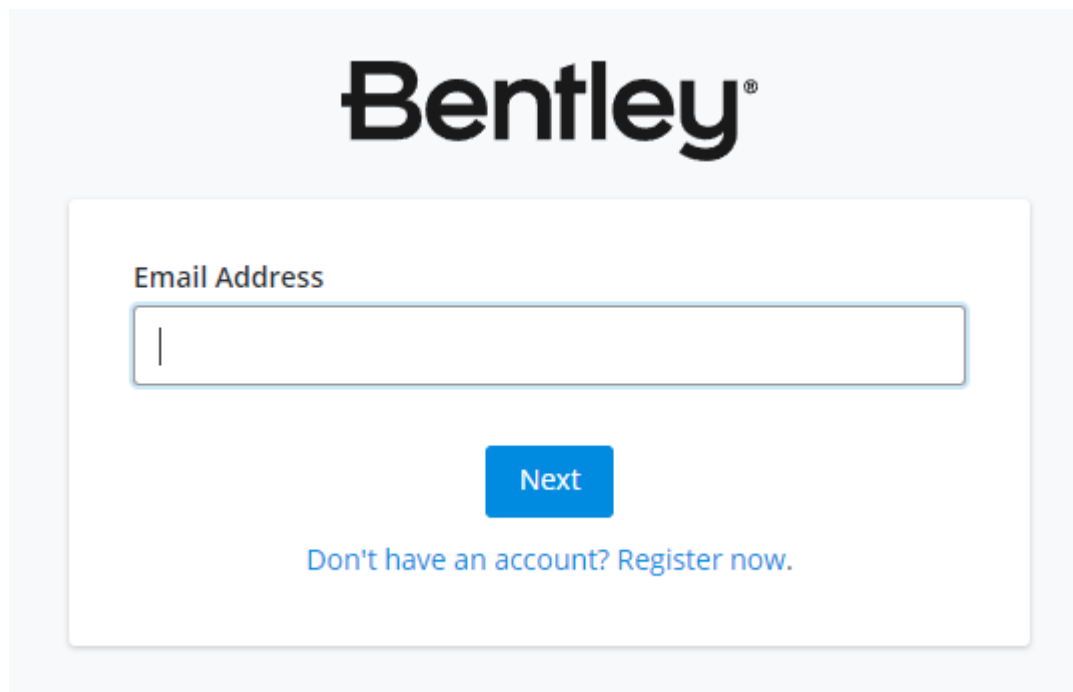

If you have your email address and need your password (or have forgotten your password), click [here](#).

To obtain Technical or Licensing Support for your products, please submit a service ticket [here](#).

For product activation and additional licensing information, please click [here](#).

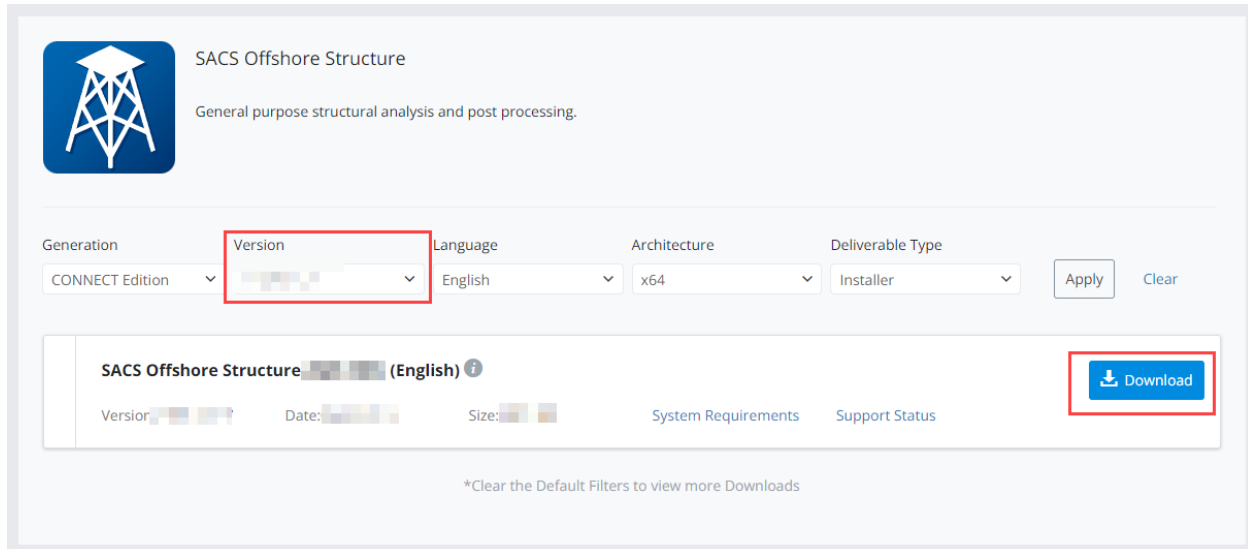

1.1 Download SACS Installer

Navigate to the the [SACS Software Download page](#). Log into the web site if you are not already logged in.

The image shows a login form for Bentley. At the top, the Bentley logo is displayed in a large, bold, black font. Below the logo, there is a white rectangular box with a thin gray border. Inside this box, the text "Email Address" is written in a small, gray font above a text input field. The input field is a simple rectangle with a vertical cursor on the left. Below the input field, there is a blue rectangular button with the word "Next" in white text. At the bottom of the white box, the text "Don't have an account? Register now." is displayed in a blue, clickable font.

Note: Each company has an onsite Bentley administrator that was designated when an account is first created. If you do not have a current log on, please contact your onsite Bentley Administrator who can assist you with the correct information and permissions. Otherwise, contact Bentley directly (see links atop of document).

Select the version number from the dropdown menu and press the “Download” link. NOTE: The SACS installer contains ALL available modules and features. These features are accessible through the Entitlement Service. All modules have a trial period of seven days.

1.2 SACS Updates

SACS updates are created as needed. Notifications of these updates are included in:

- Bentley Press release
- SACS News tab in the SACS Executive shown below:

2 Installation Guide

The following provides general instructions to install SACS on a single computer system. The images depicted may not be up to date, but the general procedure remains correct. All downloaded installation files should be placed on the computer's desktop before starting. The procedure requires that a person with **Administrator rights** be logged on before initiating the installation.

2.1 Install From Downloaded Files

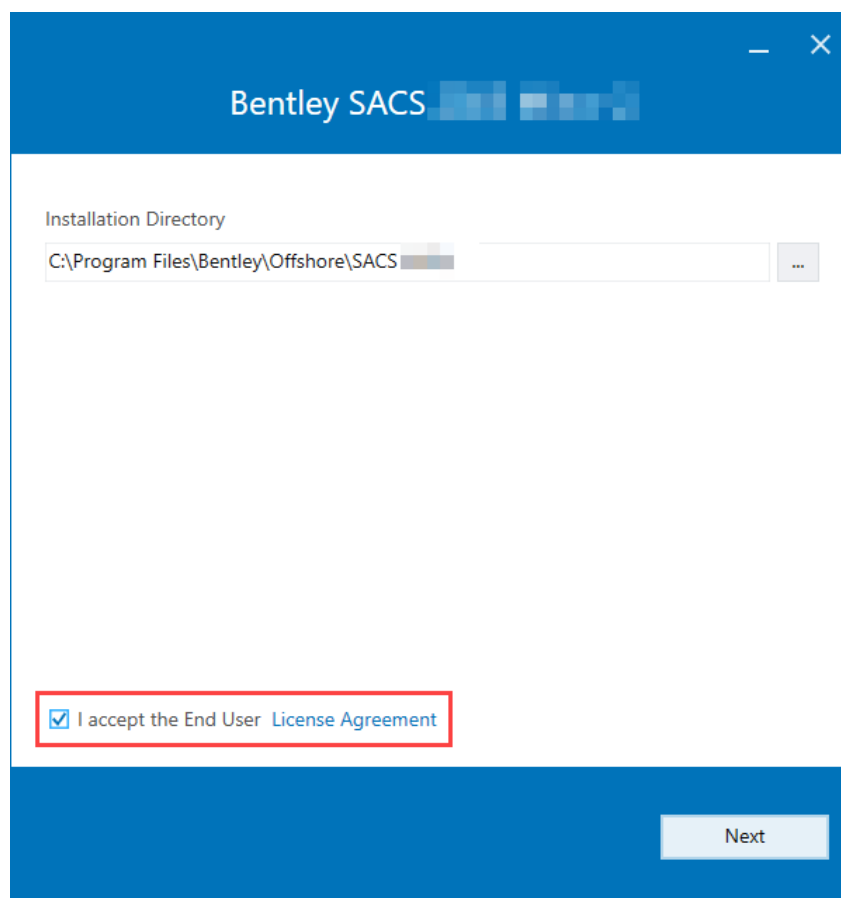

1. To install Bentley applications, ensure you have logged in to the computer with an account that has **full administrative privileges**. If you are unable to log in with a suitable account, then contact your network administrator to login and perform the installation.
2. All download files from above should be placed onto the computer where the application(s) are to be installed; suggest the desktop or create a folder to copy the files to. Use 'My Computer' to browse to downloaded files and double click on the file ***.exe** file to start the installation. Continue to the next section.

2.2 Install Bentley SACS 24.00

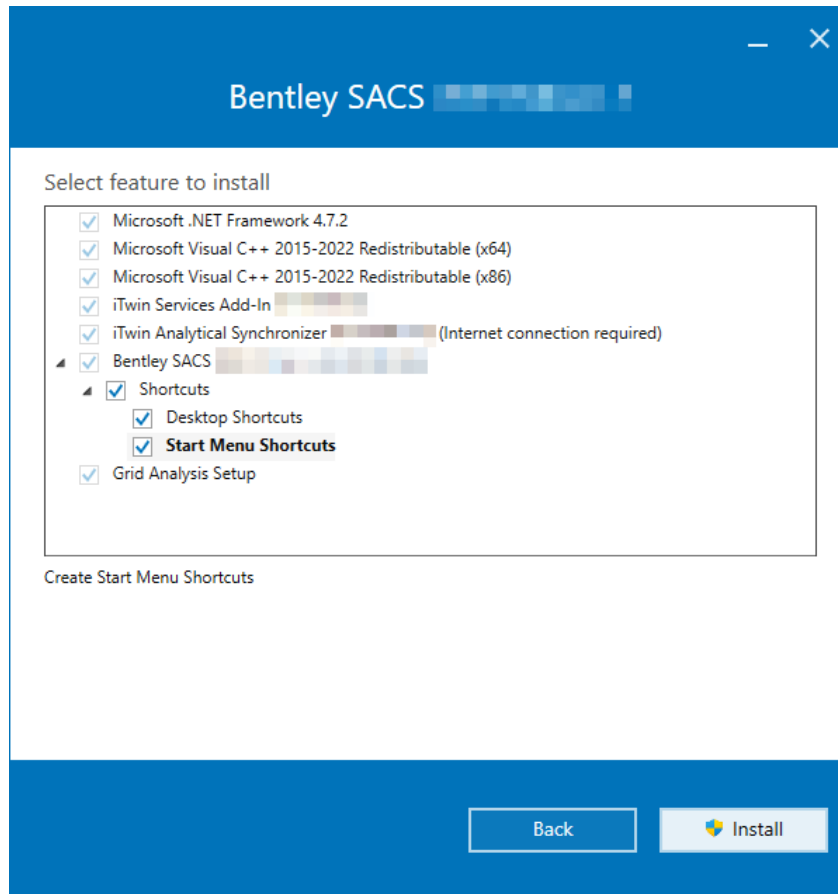

SACS 24.00 can be run side-by-side with all previous versions of SACS. Close all other applications currently running and then navigate to the EXE file downloaded using the procedure above and double click on it to start the installation process.

Note: The application should not be installed from a network location; suggest that the EXE files are on the user's system before starting the installation.

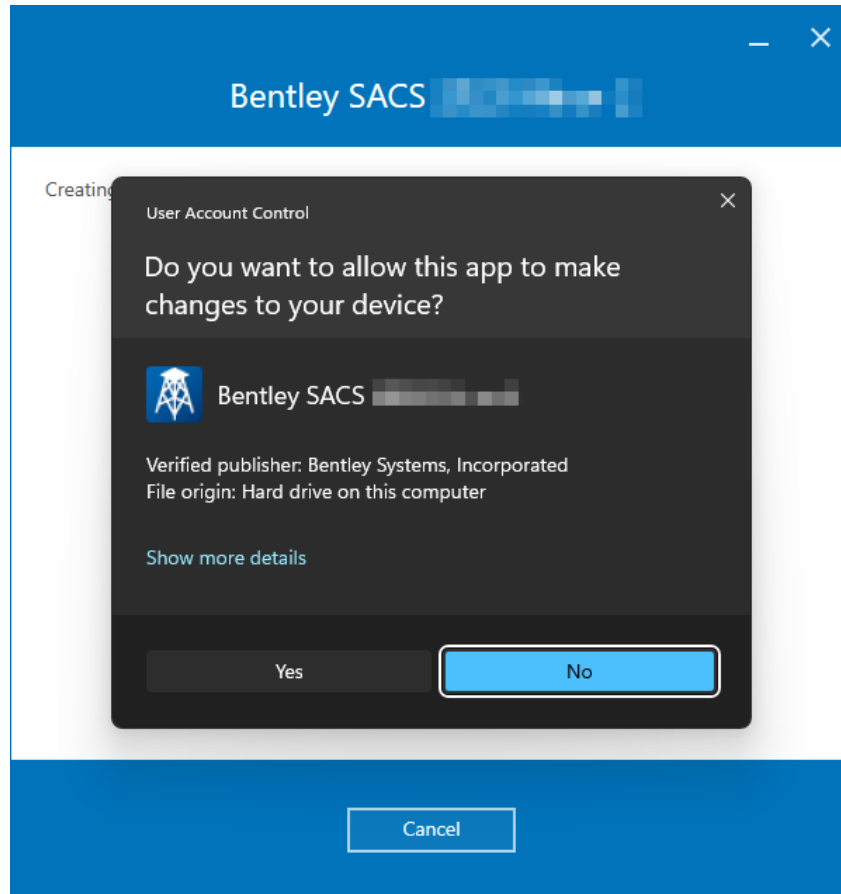

Enter the installation directory or used the recommended default installation directory. Read the License Agreement and accept by clicking the highlighted checkbox. Click the **Install** button to proceed to install the pre-requisites.

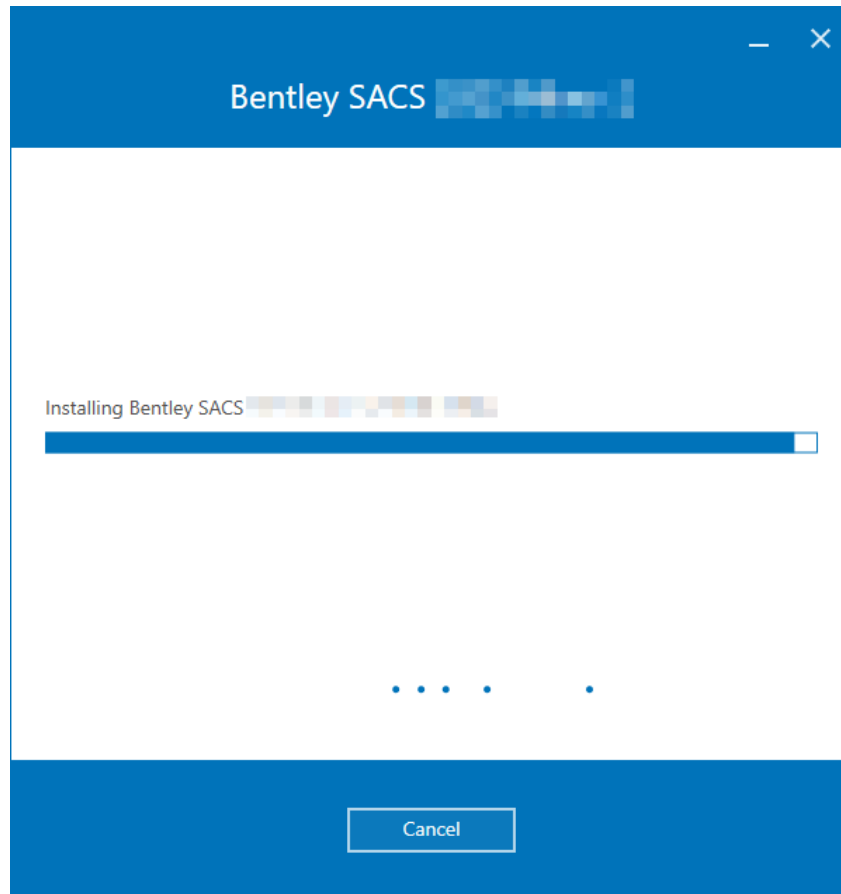

Select the components you wish to install. Then select **Install** to begin the installation.

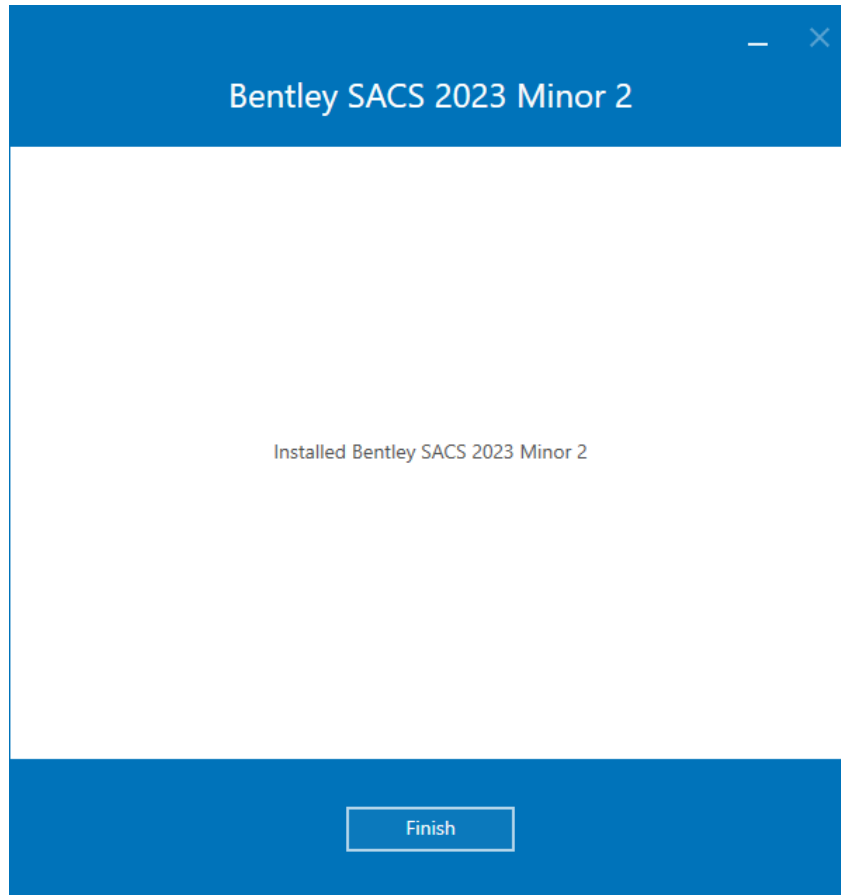

You may be prompted with a User Account Control dialog to allow the SACS Installer to make changes to your device. Select **Yes** to continue.

SACS and all selected components will then be installed to the selected path.

If SACS is successfully installed, you will be notified with the following message. Select **Finish** to complete the installation process. If the installation fails, your device will be restored to the system restore point generated at the beginning of the installation.

2.3 Command-Line Options

The SACS installer may be executed from the command line with a number of options. Each option is detailed below:

`/passive`

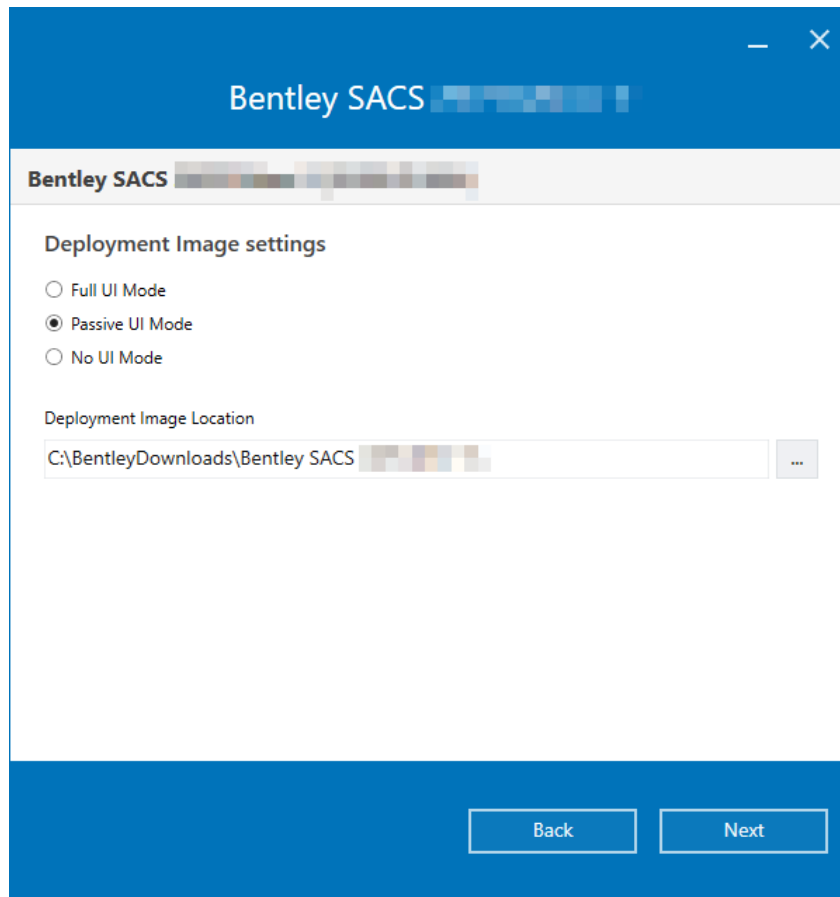

Passive installation option. Display a minimal UI with all default installation options selected.

`/quiet`

Quite installation option. Install SACS with no installation UI and default options selected.

`/layout`

Create a deployment image with preselected options. Installation Directory and Feature selections options are entered using the standard installation options, but an additional dialog is added to select the deployment mode (Full, Passive, or Quiet) and the deployment image location. Instead of installing the program, an executable will be created with the selected installation options.

3 License Setup Guide

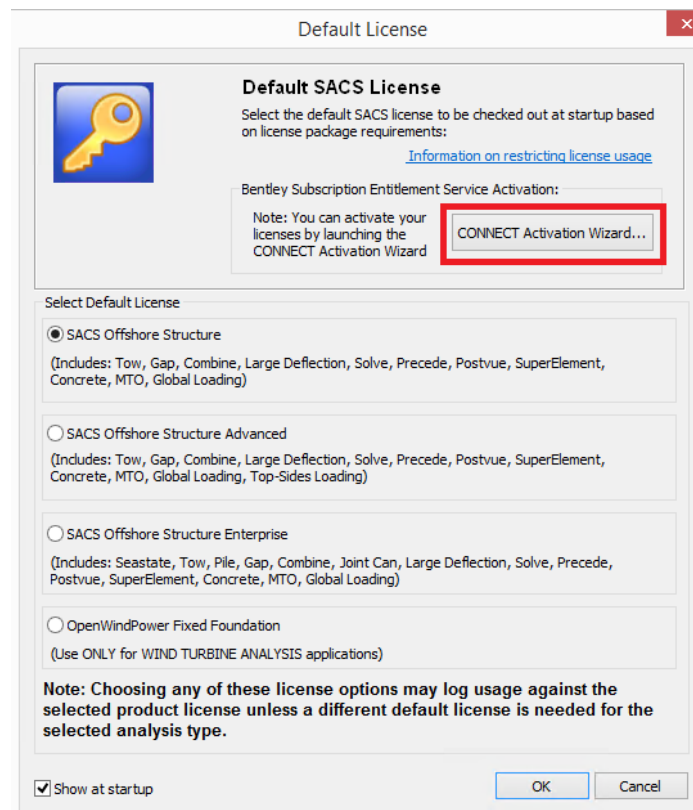

3.1 Subscription Entitlement Service

Subscription Entitlement Service (SES) (Formerly CONNECT Licensing) is Bentley's new process for product activation, enhancing our users' digital workflows and improving our licensing capabilities with features such as:

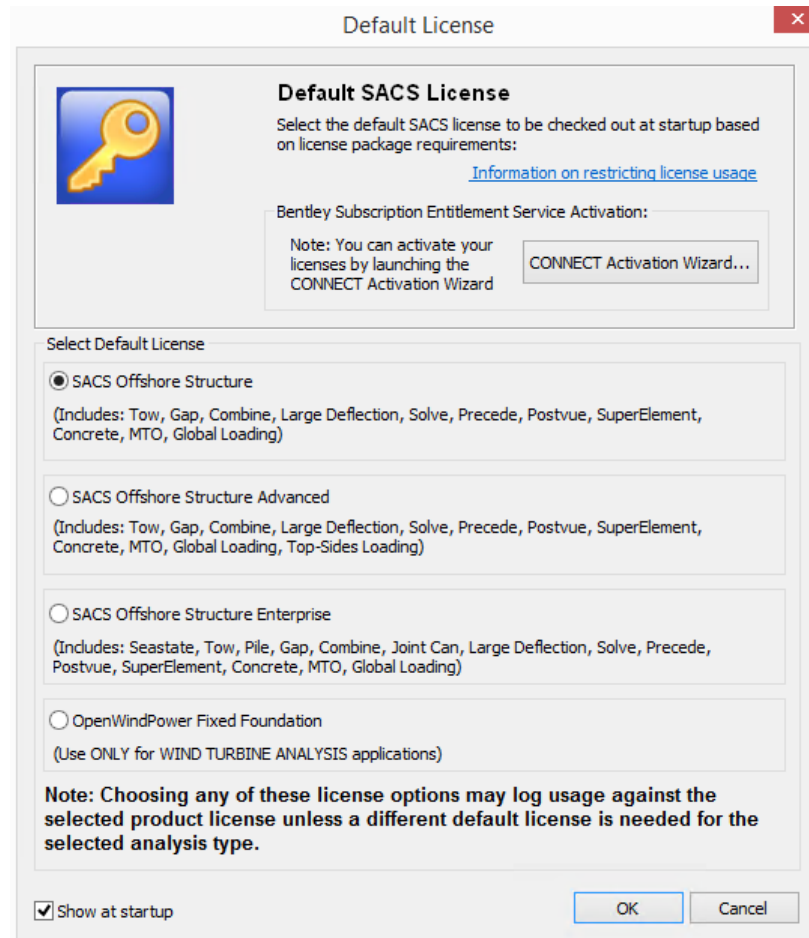

- License alert notifications when you are approaching a custom usage threshold
- Replacing site activation keys with user validation, enhancing security around your Bentley licenses and subscriptions

Traditionally, product activation has been through an activation key that an Organization distributed to all of its users. With SES, product activation is managed by user sign in through the CONNECTION Client, which is installed on each machine that uses Bentley applications. This offers a more secure and manageable system as it offers usage alerts, notifying your users when they are about to reach a certain usage limit set by the Administrator. You can find more information on configuring Subscription Entitlement Service [here](#).

The licensed SACS products must now be activated. SACS products support a 7-day trial license. Launch SACS 24.00. The following dialog will appear. Click on the “Bentley Activation Wizard...” button and follow the instructions described [here](#).

You can now select the default license.

The image shows a software dialog box titled "Default License". It features a key icon and instructions for selecting a default SACS license. The "Select Default License" section contains four radio button options: "SACS Offshore Structure" (selected), "SACS Offshore Structure Advanced", "SACS Offshore Structure Enterprise", and "OpenWindPower Fixed Foundation". Each option includes a list of included features in parentheses. A note at the bottom states that choosing any of these options may log usage against the selected product license unless a different default license is needed. At the bottom left, there is a checked checkbox for "Show at startup". At the bottom right are "OK" and "Cancel" buttons.

Default License

Default SACS License

Select the default SACS license to be checked out at startup based on license package requirements:
